

Looking for a cost effective telephony solution for your real estate business but Have You Asked?

- Can customer reach my sales person anytime on their smart phone as an extension?
- Can customer reach the same sales person when he calls back from same number ?
- Can I have auto dialing for my telesales?
- Does it support direct inward system access (DISA)?
- Can I manage multiple sites /branches from one location?
- Can the calls be routed based on projects?

IP PBX - Real Estate

KEDITEL brings a complete telephony solution for real estate sector that supports activities in the office and the field for better communication. Real estate company can now have better coordination with customers and sales person to enhance the services and accelerate the business.

FEATURES:

Smart phone as extension: **KEDITEL** IP PBX supports smart phones as extensions within Wi-Fi range. This features helps customer to reach the sales person anytime.

Remember my calls: If the customer calls back from same number, **KEDITEL** IP PBX will automatically route the calls to the sales person who previously attended the call.

Call center solution with auto dialing: **KEDITEL** IP PBX provides complete call center solution, which handle both outbound and inbound calls. It enables voice blasting, ACD dialing, report generation and many more.

Multiple sites /branch connectivity: With **KEDITEL** IP PBX, the real estate company can have seamless communication between sites / branches.

Time based call routing: **KEDITEL** IP PBX allows to route the calls to different extensions /destinations based on the time call is made.

Direct inward system access (DISA): **KEDITEL** IP PBX enables employees to access the office IP PBX from outside to make STD, ISD and local calls at anytime. Hence reduces in calling cost.

Call based on the projects: **KEDITEL** IP PBX enables the real estate company to assign separate DID number for each project and receive calls based on projects.

Others Features:

- Built in call recording
- Call detail report
- Voice mail
- Voice mail to Email
- Receptionist console
- Custome message
- Third Party software integration (ERP, CRM, SMS/click to call)
